SINCOR Professional Guide: 12-Week Multi-Agent Deployment

Introduction

Welcome to SINCOR Professional - your platform for orchestrating 25 AI agents in sophisticated, multi-step workflows.

This guide walks you through a 12-week deployment timeline to fully leverage agent coordination, advanced integrations, A/B testing, and workflow optimization.

Week 1-2: Foundation & Architecture

Understanding Agent Roles - Scouts: Discovery and prospecting - Synthesizers: Data cleaning and deconfliction - Builders: Automation and workflow creation - Negotiators: Outreach and relationship building - Caretakers: Data hygiene and maintenance - Auditors: Quality assurance and testing - Directors: Prioritization and orchestration

Setting Up Your Workspace - Create team structure (up to 10 users) - Set permission levels (Admin, Manager, User, Viewer) - Configure audit logging - Enable two-factor authentication

Connecting Enterprise Integrations Professional includes 15 integrations: - CRM: Salesforce, HubSpot, Pipedrive, Microsoft Dynamics - Marketing: Marketo, Pardot, ActiveCampaign, Klaviyo - Support: Zendesk, Freshdesk, Intercom - Analytics: Google Analytics, Mixpanel - And 5+ more

Week 3-4: Multi-Agent Orchestration

Contract-Net Protocol How agents bid on tasks and optimize allocation.

Workflow Branching Create complex decision trees: - If lead quality < 50: reassign to Synthesizer
- If lead matches criteria: escalate to Negotiator - If response > 48 hours: trigger follow-up

Priority Management Set agent task queues and priorities for maximum efficiency.

Performance Baselines Measure your agents' performance: - Tasks completed per day - Quality scores - Cost per outcome - Time to value

Week 5-6: Advanced Workflows

Workflow 1: Lead Generation Funnel Scouts → Synthesizers → Negotiators → CRM

Workflow 2: Customer Retention Monitors → Alerts → Nurture Agents → Account Managers

Workflow 3: Market Intelligence Scouts → Analyzers → Dashboards → Decision Makers

Workflow 4: Content Generation Builders → Writers → Editors → Distribution

Week 7-8: A/B Testing & Optimization

Setting Up Tests - Subject lines for email - Outreach timing - Message personalization approaches - Lead scoring weights

Measuring Results - Conversion rate by variant - Statistical significance - Cost per conversion - Customer lifetime value

Applying Winners Automatically scale winning variations across your agent network.

Week 9-10: Escalation & Workflow Branching

Smart Escalations Route complex cases to humans intelligently.

Workflow Conditions If-then rules: - If deal value > \$50K: escalate to account manager - If 3 failed attempts: mark as do-not-contact - If NPS < 5: trigger retention specialist

Custom Fields Define fields tracked through entire workflow.

Week 11-12: Analytics & Optimization

Executive Dashboard - Pipeline value - Win rate trends - Agent productivity - ROI by channel

Agent Analytics Performance by individual agent.

Optimization Recommendations AI-generated suggestions for improvement.

Support & Resources (Professional Tier)

- **Priority Email Support:** 4-hour response guarantee - **In-app Chat:** AI assistant with human escalation - **Weekly Strategy Calls:** Included with plan - **Knowledge Base:** 1,000+ articles + video tutorials - **1-on-1 Onboarding:** Included first month

Scaling Beyond Professional

Ready for Enterprise features? - Custom agent development - White-label capabilities - Dedicated success manager - 24/7 priority support
